INTRODUCTION

This report highlights key findings from the newly released 2020 Decennial Census data for legislative redistricting. It discusses Puerto Rico's historical population losses between 2010 and 2020 as well as the major racial identification shifts occurring in the island between 2000 and 2020. It will examine the significant racial identification shift from "One Race" to "Two Races" as well as the notable racial identification shift from "whiteness" to "some other race".

Island-Wide Population Shift

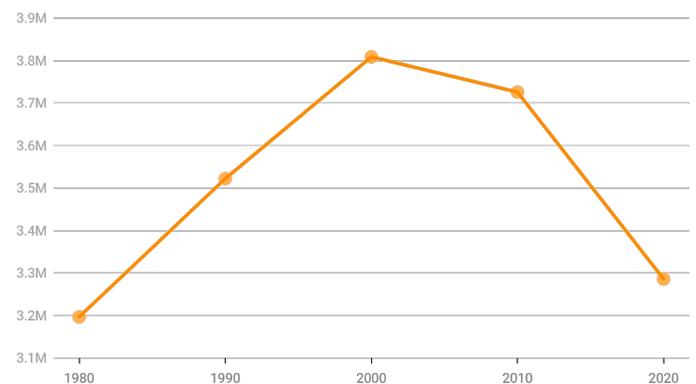

Puerto Rico's population declined from 3,725,789 in 2010 to 3,285,874 in 2020, an -11.8 percent change according to the 2020 decennial census, resulting in a population loss of 440,000 in a 10-year span. According to the U.S. Census Bureau, only 3 other states in the U.S. showed any decline in population between 2010 and 2020. Puerto Rico had the absolute largest population decline, compared to West Virginia (-3.2%), Mississippi (-0.2%), and Illinois (-0.1%).

While the United States saw a modest population growth (7.1%), Puerto Rico showed a rapid population decline in the past decade. This is partly attributable to demographic shifts such as low fertility rates among women and migration to the U.S. mainland (Abel & Deitz 2014). The 2006 economic crisis also contributed to population decline between the decades, as both high unemployment rates and financial instability pushed working age adults to find better economic opportunities in the U.S. mainland, especially after the elimination of the IRS Section 936 (Feliciano 2018). Finally, the 2017 natural disasters of Hurricane(s) Irma

and Maria also spurred Puerto Rico's population decline in terms of migration. Since Hurricane(s) Irma and Maria, migration has intensified, especially among adults and the children accompanying them (family units), and this pattern shifted the island's demographic structure (Hinojosa, Meléndez, and Pietri 2019).

Comparing Decennial Census Data Across the Decades, 1980 to 2020

Puerto Rico's total population 1980 – 2020

Source: U.S. Census Bureau, Census 1980, 1990, 2000, 2010 & 2020 • Created with Datawrapper
Created by Damayra I Figueroa Lazú

Population results from the 2020 census show a worsening pattern of decline that had already been noted for the first time in 2010. At that time census results showed the first decline in population in more than 200 years. As shown in figure 1, in 1980 the U.S. Census reported 3.1 million people living in Puerto Rico, this increased by 10 percent in 1990 to 3.5 million. This represented an addition of 325,517 residents between 1980 and 1990. Population growth continued to rise steadily between 1990 and 2000, from 3.5 million to 3.8 million, adding 286,573 residents (see figure 1). During this period, Puerto Ricans in Puerto Rico outnumbered stateside Puerto Ricans. Between 1990 and 2000, the population increased by 8 percent, this was the last time population increase was seen in Puerto Rico.

PUERTO RICO'S 2020 RACE/ETHNICITY DECENNIAL ANALYSIS

By 2010, the population had declined by 2 percent, from 3.8 million to 3.7 million, indicating a loss of 82,821 residents from the prior decade. Between 2010 and 2020, Puerto Rico entered a phase of both economic austerity and back-to-back natural disasters. In other words, in the recent 10 years, from 2010 to 2020, Puerto Rico lost about 440,000. This is much higher than the population gained between 1980 and 1990, thus, Puerto Rico's current population effectively mirrors its 1980 population. The population loss of 439,915 between 2010 to 2020 is about 4 times larger compared to -82,821 in the 2000 to 2010 period alone.

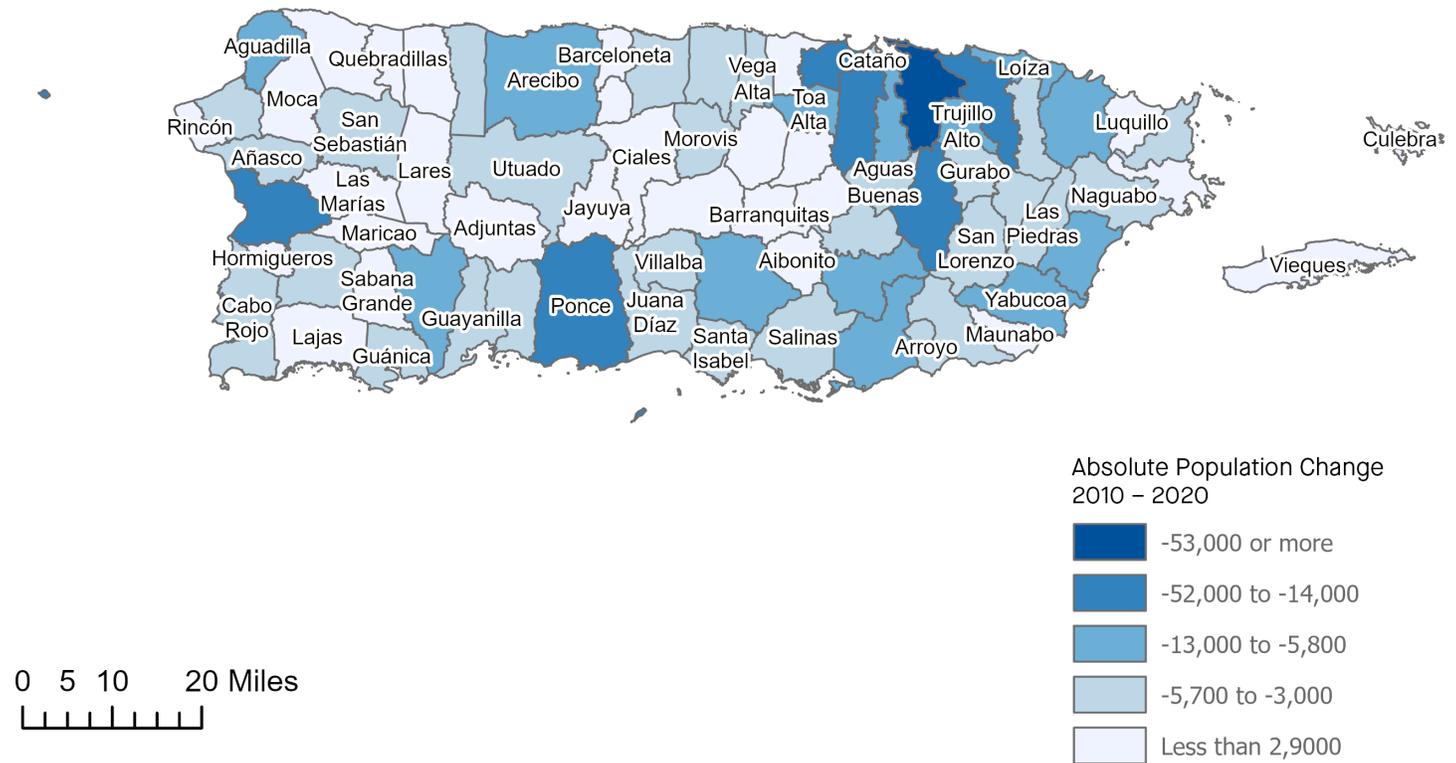

Population Change by Municipalities

For the first time in history, the new 2020 decennial data revealed population decline across all municipalities in

Puerto Rico. In previous decades, some municipalities lost population while others gained. For instance, between 2000 and 2010, 36 out of 78 municipalities showed population increases (see Appendix A). This was not the case between 2010 and 2020.

The greatest population declines were seen in the San Juan metropolitan area. As shown in figure 2, San Juan had the largest absolute decline, with a loss of 53,067 residents or -13% percent change since the last decade. This was followed by -28,836 (-17 percent change) in Ponce, -28,836 (-11 percent change) in Bayamón, -16,003 (-18 percent change) in Mayagüez, -15,649 (-12 percent change) in Carolina, -14,316 in Caguas (-11 percent change), -8,748 (-19 percent change) in Guayama, -8,686 (-9 percent change) in Arecibo, and -8,144 (-8 percent change) in Guaynabo.

Thirty-one municipios lost population at rates higher than Puerto Rico as a whole, ranging from -12% in Morovois to -29% in Guánica. As shown in figure 3, Guánica accounted for a 29 percent decline followed by Maricao (-24%), Loíza (-21%), Yabucoa (-20%), Guayama (-19%), Arroyo (-19%), Yauco (-19%), Mayagüez (-18%), Cataño (-18%), and Guayanilla (-18%). Spatially, southwest and southeast coastal municipalities showed the highest population percent change (with the exception of Maricao and Loíza).

As shown in figure 3, population percent change was lower in municipalities with low population counts. That was the case for Rincón (-0.1%) followed by Culebra (-1%), Naranjito (-4%), Bararanquitas (-4%), Aibonito (-5%), Isabela (-6%), Dorado (-6%), Moca (-7%), Camuy (-7%), and Corozal (-7%).

The Outlook

The 2020 decennial census revealed a stark demographic reality for Puerto Rico that has been

unfolding in the past decade. From a demographic perspective, Puerto Rico’s aging, fertility rates, and out-migration may have serious social and economic implications.

The Shift in Puerto Rican Racial/Ethnic identity

According to the 2020 Decennial Census, there were about 3.29 million people living in Puerto Rico, a notable decline of 439,915 individuals from 2010 (-11.8%). In comparison, the United States population grew by 7.4% between 2010 and 2020. In terms of race, the 2020 decennial census has shown a dramatic shift from how Puerto Ricans identify themselves now from 10 years ago. Most of the total population in Puerto Rico identified as “White and Some Other Race” (38.5%) followed by “Some Other Race alone” (25.5%) in 2020 compared to a majority of the total population identifying as “White alone” in both 2000 (80.5%) and 2010 (75.8%). In 2010, 75.8% of those in Puerto Rico identified as “White alone” compared to the significant

PUERTO RICO'S 2020 RACE/ETHNICITY DECENNIAL ANALYSIS

drop to 17.1% in 2020. Although the fifty states also experienced a drop of those who identify as White alone at 8.6% between 2010 and 2020, Puerto Rico's drop of -80.2% is too significant to miss. In addition, there were other notable shifts for those who identified as solely one race in 2010 to two races in 2020. Puerto Rico's endurance of the lingering effects of the ongoing

economic crisis, fiscal control, lack of humanitarian aid, racial discrimination, and current racial justice movements may help explain the dramatic racial shift between 2010 and 2020.

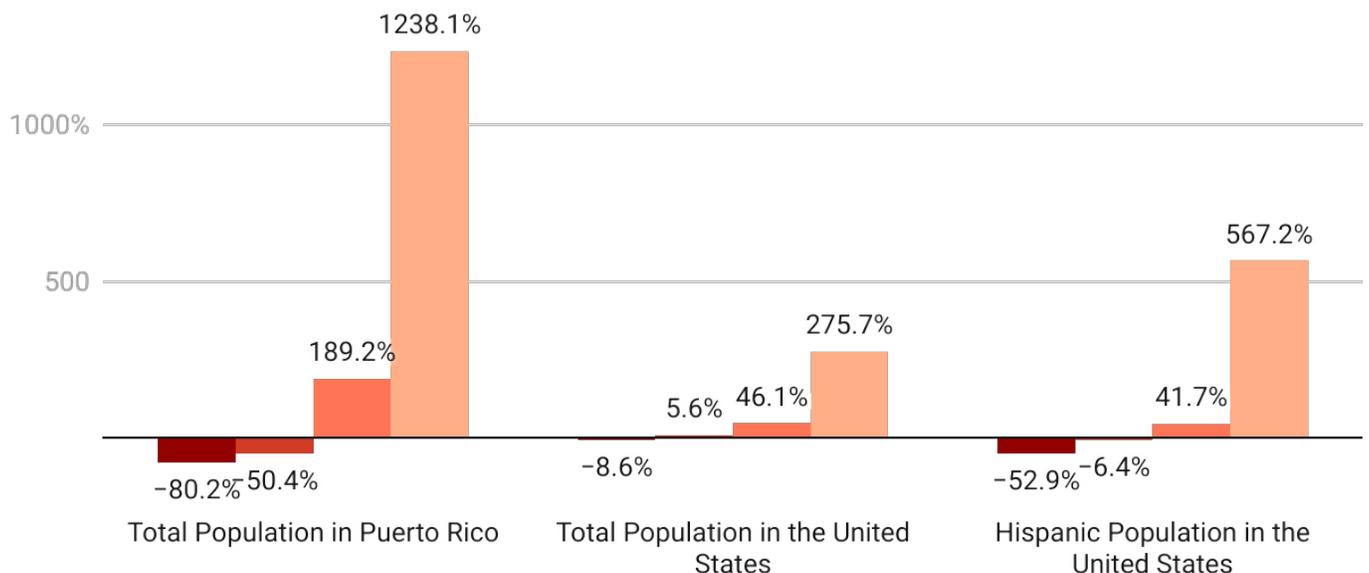

Puerto Rico vs. United States, Race by Total Population and Hispanic Population, 2010 and 2020

Race	2010			2020		
	TOTAL POPULATION IN PUERTO RICO	TOTAL POPULATION IN THE UNITED STATES	HISPANIC POPULATION IN THE UNITED STATES	TOTAL POPULATION IN PUERTO RICO	TOTAL POPULATION IN THE UNITED STATES	HISPANIC POPULATION IN THE UNITED STATES

PUERTO RICO'S 2020 RACE/ETHNICITY DECENNIAL ANALYSIS

Puerto Rico vs. United States

In terms of total population, although both the U.S. and Puerto Rico experienced a decrease of those who identified as “White Alone,” Puerto Rico experienced a drastic decline at -80.2% compared to the total population of the United States at -8.6% and the Hispanic Population in the U.S. at -52.9% between 2010 and 2020. In regard to those who identified as “Black or African American alone”, Puerto Rico experienced a decrease of 50.4% as well as the Hispanic Population in the U.S. at 6.4% while the U.S. as a whole experienced an increase of 5.6%. All three populations, the total population in the U.S. and Puerto Rico along with the Hispanic Population in the U.S. experienced a notable increase of those who identified as “Some Other Race” between 2010 and 2020. However, Puerto Rico’s

increase was quite drastic at nearly 200% (189.2%) compared to the total population of the U.S. (46.1%) and the Hispanic Population (41.7%). In terms of those who selected “Two or More Races”, all three populations discussed the total population in both the U.S. and Puerto Rico along with the Hispanic Population in the United States experienced extreme increases from 2010 to 2020. However, Puerto Rico surpassed the U.S. considerably at an increase of 1238.1% from 3.3% of the total population in 2010 to 49.8% in 2020, compared to the total population in the U.S. at 275.7% from 2.9% to 10.2% and the Hispanic Population in the U.S. at 567.2% from 6% in 2010 to 32.7% in 2020. In 2020, those who identified as “Two or More Races” made up almost half of the population in Puerto Rico compared to 10% of the total population in the U.S.

Puerto Rico’s Total Population by Race throughout the decades 2000-2020

RACE CATEGORIES	2000	2010	2020

Source: U.S. Census Bureau, 2000 & 2020 Decennial Census Redistricting Data (PL 94-171) • Created with Datawrapper • Created by Damayra I Figueroa Lazú

There was a 54.8% drop in those who selected “One Race” in Puerto Rico from 95.8% 2000 to 50.2% in 2020. There was a 81.7% drop from those who selected “White Alone” from 2000 of 80.5% of the total population down to 17.1% in 2020. The second race category those in Puerto Rico most identified with in 2010 was “Black or African American alone” which also dropped by 50.4% in 2020 from 12.4% from the total population in 2010 to 7.0% in 2020. The drop between 2000 and 2020 was

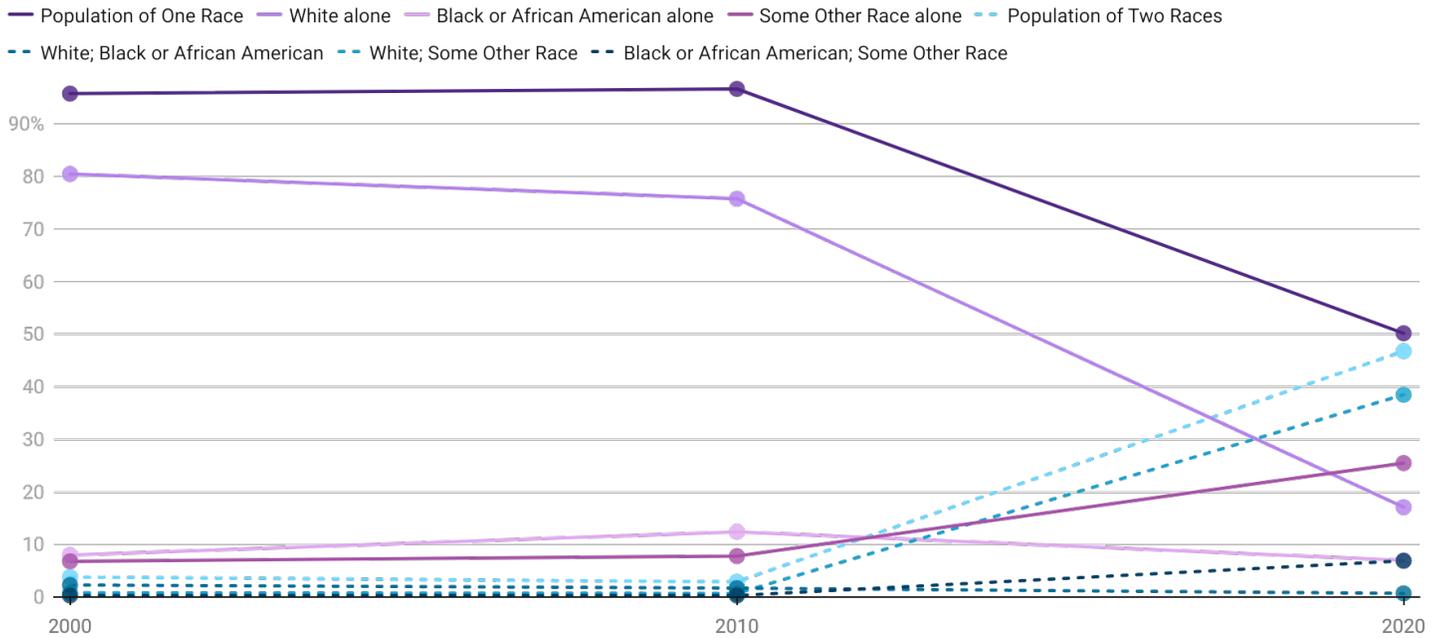

smaller for those who identified as “Black or African American alone” at 24.5%. The drastic increase occurred for “Some other Race alone”. There was a 222.4% jump from 6.8% of the total population in 2000 to about a quarter of the total population (25.5%) in 2020. The other half of the population in Puerto Rico (46.8%) identified with “Two Races” in 2020, a dramatic increase from 2000 at 3.8% of the total population. In 2000, more than half of those who selected “Two Races” had

PUERTO RICO'S 2020 RACE/ETHNICITY DECENNIAL ANALYSIS

identified as “White and Black or African American” (60.3%). This percentage dropped to 1.6% in 2020. However, there was a dramatic increase in those who selected “White and Some other Race” from 0.8% of the total population in 2000 to 38.5% in 2020. There was

also a notable increase for those who identified themselves as “Black or African American and Some other Race” from 0.3% of the total population in 2000 to 6.9% in 2020; a 1,803.1% increase.

Race Categories and Sub-categories in Puerto Rico by Year, 2000 - 2020

Source: U.S. Census Bureau, 2000 & 2010 & 2020 Decennial Census Redistricting Data (PL 94-171) • Created with Datawrapper • Created by Damayra I Figueroa Lazú

Municipios, 2010 - 2020

Population of One Race

In all 78 municipalities in Puerto Rico, there was a decrease of those who identified as “one race” from 2010 to 2020 by at least 30%. Guanica had the largest decrease of “one race” from 2010 to 2020 at 63.3% while Vieques had the smallest at 30.6%. For those who identified as “One Race” there were three specific races those in Puerto Rico most identified with: “White alone”, “Black or African American alone”, and “Some other Race.”

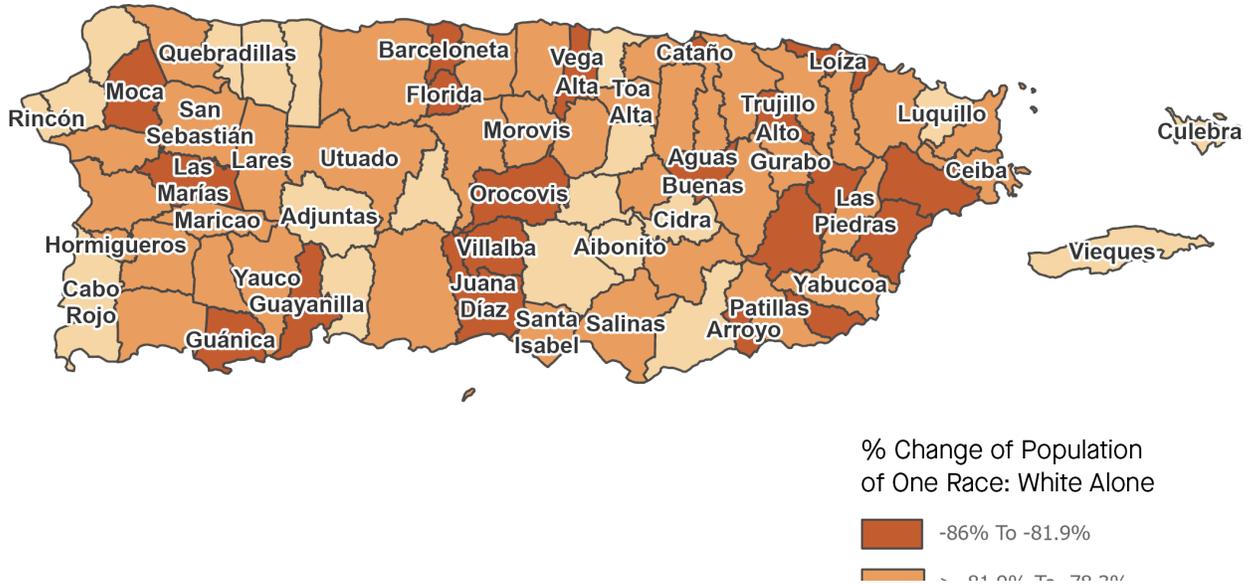

“White Alone” was the only one where all 78 municipalities experienced a decrease ranging from about 70% to about 86%. Florida had the biggest drop of 85.9% while Culebra had the lowest (-69.4%). The larger decreases are scattered across the island with no particular area of the island to note.

Those who identified as “Black or African American alone” also experienced a drop between 2010 and 2020 in all municipios except 4: Adjuntas, Maricao, Naranjito, and Rincón. Maricao had the largest increase by 22.1% from those who identified as “Black or African American”, followed by Rincón (10.2%), Naranjito (2.5%), and Adjuntas (0.3%). The largest decrease took

place in Culebra at -70.4% followed by Arroyo (-68.9%), San Juan (-61.9%), and Loíza (-61%).

One might take note of the significant decrease in Loíza, the county with the highest percentage of those who identified as “Black or African American” from the total population in both 2010 and 2020; where in 2010 64.3% of the population identified as “Black or African

American alone” compared to 31.8% in 2020. The biggest decrease happened amongst the metropolitan areas and all along the border of the east side of the island.

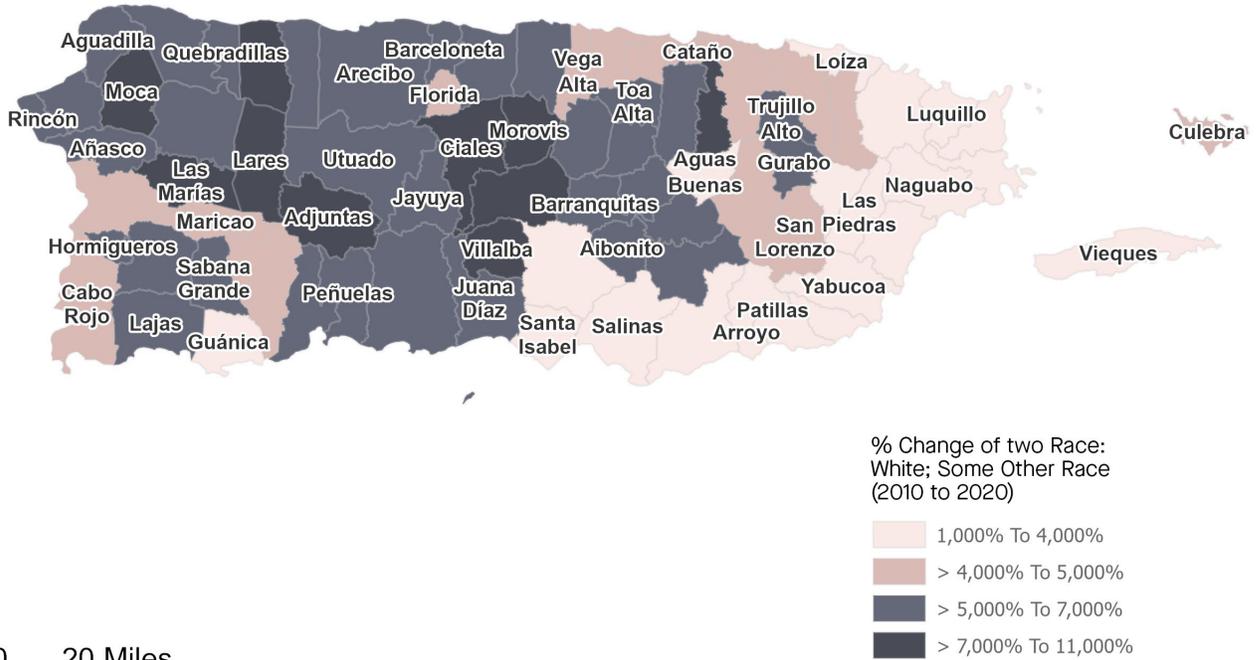

Population of Two Races

For those in Puerto Rico who identified as “two races,” there was a drastic increase by at least 240% in all 78

municipalities from 2010 to 2020. Adjuntas had the largest rate of change from 2010 to 2020 at 4054.8% followed by Utuado (3309.2%). For those who identified as “Two Races” it appears to be a combination of some form of the top three most identified races in those who identified with “One Race”: “White and Black or African American”, “White and Some Other Race”, and “Black or African American and Some other Race.”

PUERTO RICO'S 2020 RACE/ETHNICITY DECENNIAL ANALYSIS

Percent Change of Two Races: White & Some Other Race, 2010 - 2020 by Municipio

Source: U.S. Census Bureau, 2010 & 2020 Decennial Census Redistricting Data (PL 94-171), TableID: P2 • Created by: Jorge Soldevila Irizarry

Between 2010 and 2020, 73 municipalities experienced a decrease for those who identified as “White and Black or African American” with Yabucoa (-90.3%) and Culebra (-90%) experiencing the largest decrease and Corozal, the smallest (-1.7%). Only four municipalities experienced an increase of those who identified as “White and Black or African American”: Adjuntas (126.6%) followed by Peñuelas (118.4%), Utuado (8.7%), and Florida (2.3%); three of such bordering one another. Las Marías did not experience any change between 2010 and 2020.

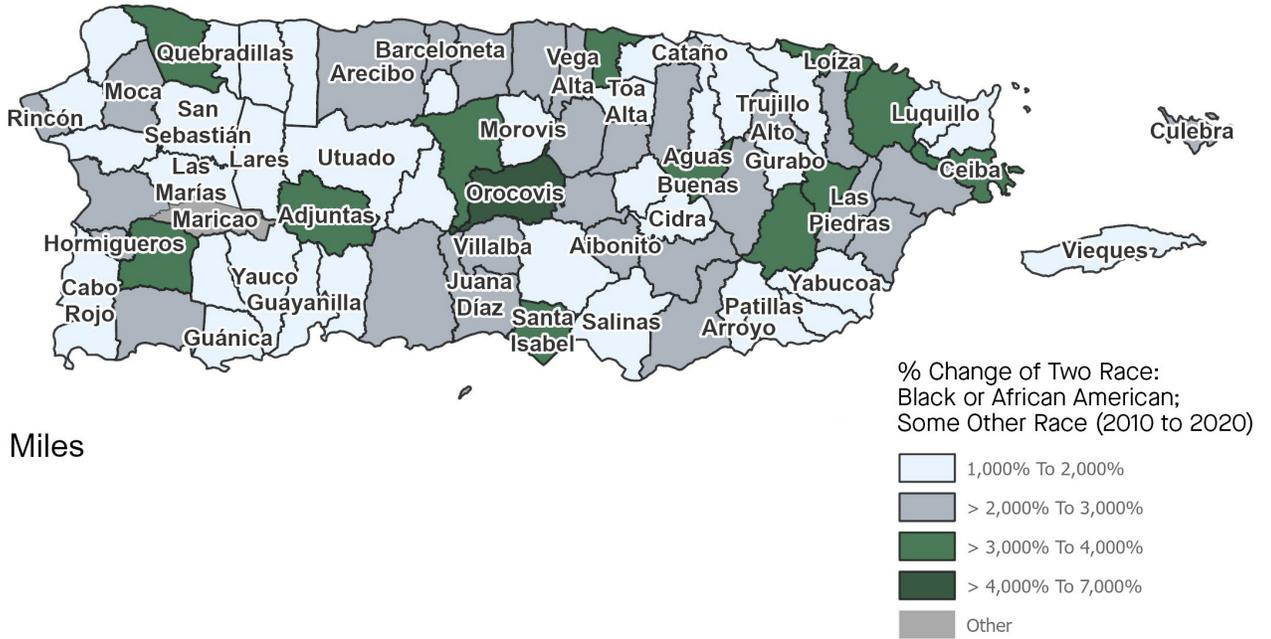

For those who identified as “White; or Some other Race”, there was an astonishing increase in all 78 municipalities ranging from nearly 1,500% to 10,400%. Ciales had the highest increase at 10,359.1% followed by Moca (8,884.7%) and Las Marías (8,153.3%). The largest of the increases seem to be in the center and west of the island. The municipality with the lowest increase between 2010 and 2020 was Maunabo (1,479%) followed by Yabucoa (1,562%) and Vieques (2,041.8%)

Similar to those who identified as “White; or Some other Race,” there was an astonishing increase in all 78 municipalities as well for those who identified as “Black or African American; Some Other Race” between 2010 and 2020. Maricao had the most drastic increase of 11,300% followed by Orocovis (6,635.3%), San Lorenzo (3,970.6%), Isabela (3,853.4%) and Loíza (3,701%). The municipality with the lowest increase between 2010 and 2020 was Comerio (1,117.9%) followed by Utuado (1,147.2%) and Guanica (1,320%).
