Through hundreds of images of the "pioneers"-those Puerto Rican migrants who established themselves in New York City between the 1890s and the end of World War II-we capture a glimpse of their daily lives and of their individual and collective stories. This rich collection of images from the Archives of the Center for Puerto Rican Studies at Hunter College helps to examine the history of the Puerto Rican community at a time when it was spreading its roots in New York City's social, political, cultural, and economic life.

Following World War II, Puerto Ricans moved to New York in record numbers and joined a community of compatriots who had emigrated decades before or were born in diaspora. In a series of vivid images, this book brings to life their stories and struggles, culture and values, entrepreneurship, and civic, political, and educational gains.

This documentary traces the life of a pioneer in higher education from his humble roots in New York City to his days in combat in World War II to the founding of Centro, the only institution dedicated solely to the Puerto Rican experience in the United States. (53 minutes)

Pura Belpré, New York City’s first Puerto Rican librarian, was an ambassador for the New York Public Library’s work with the Latino community. The innovative storyteller used puppetry, arts and crafts as tools to teach children to read, write and express themselves and helped transform a community. (56 minutes)

Clemente Soto Vélez was a Puerto Rican revolutionary poet, journalist and activist in New York and Puerto Rico. This documentary explores the life of this pioneer with an emphasis on his contributions to community, literacy and cultural identity, his political activism and his undying support for the arts. (48 minutes)

ENDURING DISASTERS: PUERTO RICO, THREE YEARS AFTER HURRICANE MARIA (SEPTEMBER 2020)
Puerto Rico has suffered the compounded effects of multiple disasters over the last three years: the devastating impacts of Hurricanes Irma and Maria in September 2017, recurrent seismic activity in the southwest region, including a magnitude 6.4 earthquake on January 7, 2020, the current COVID-19 pandemic; all underscored by a crushing debt crisis and a federally-mandated austerity regime since 2016. Multiple natural disasters have exacerbated vulnerability and poverty, and public energy, telecommunications, water, health, and transportation systems have greatly deteriorated and become even more vulnerable, causing systematic failures in social safety nets.$5.00 | ID: CP3YAHM

ANTICIPATED VULNERABILITIES: DISPLACEMENT AND MIGRATION IN THE AGE OF CLIMATE CHANGE (JUNE 2020)
In 2017, the Massachusetts Executive Office of Energy and Environmental Affairs unveiled the Municipal Vulnerability Preparedness (MVP) program, in an effort to move forward the Commonwealth’s initiative to assist its municipalities in their efforts to assess, anticipate and plan for hazards associated with changes in climate and their vulnerability to those hazards. The MVP program assessed the city’s capability to respond to an influx of migrants driven by a climate change event. This project sought to address the city’s concerns through a multipronged analysis of the experience of the post-hurricane Maria displacement/migration of Puerto Ricans to the City of Holyoke. Included are some of the key findings and recommendations contained in the study.
